# Acconeer receives USD 300 000 order for presence application

**The order relates to Acconeer's A121 Pulsed Coherent Radar sensor for immediate delivery and comes from a Greek private capital company acting as system integrator in the construction industry. The sensors will be used for presence detection in smart buildings in Europe.**

Michel Roig, CCO at Acconeer, comments: "Smart buildings need sensing that is accurate, privacy-friendly and energy-efficient – something our radar technology is a perfect match for. We're proud to support this customer in Greece and see the order as further proof of growing demand in the advanced presence market."

In addition to publicly announced orders, Acconeer continuously receives orders of smaller amounts which are not publicly announced as they are not considered to affect the share price.

**About Acconeer AB**
With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm2. The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye Nordic Growth AB is the company's Certified Advisor (CA). For more information: **www.acconeer.com**
