

## FPC AllKey enables biometric server rack access control solution for the Indian data centre market

Hyderabad, India & Gothenburg, Sweden – January 27, 2026 – Fingerprint Cards AB (FPC) today announced that its biometric technology is being used in a biometric-based server rack access control solution developed by ActChip for Dynamic-Technologies. The solution targets the Indian market and introduces biometric authentication at the individual server rack level, adding an additional security layer within data centres.

Biometric security solutions in data centres are traditionally deployed at the facility or room level. This collaboration introduces a new application area by enabling biometric authentication at the server rack level, addressing increased security requirements and reducing the risk of unauthorized access within critical infrastructure. Actchip has developed and integrated the biometric server rack access system using FPC's AllKey biometric technology to enable secure and reliable access control for critical environments.

For Dynamic-Technologies and Actchip, this biometric solution expands their solution portfolios and enables entry into the biometric access control and bio-security segment. The initial market focus is India, where demand for secure data centre and avionics infrastructure continues to grow.

### **Adam Philpott, CEO of FPC, comments:**

"The project strengthens FPC's presence in new markets and demonstrates how our biometric technology can be extended into new, security-critical application areas. Data centres represent an important and growing segment of critical infrastructure, where secure access at more granular levels is increasingly required. It is therefore positive to see this solution being developed and deployed in India, a key growth market for FPC where demand for secure biometric solutions continues to increase."

### **Niranjan Keesara, CEO of Actchip Pvt Ltd, remarks:**

"The integration of FPC's AllKey biometric fingerprint sensor module helped us accelerate development while maintaining high standards of performance and security. Its robustness and ease of integration were key factors in successfully delivering the product to our customer."

### **Raghuraj Ananthoj, Founder-Business Head, Dynamic Technologies, added:**

"Choosing FPC as a primary user access point enabled us to deliver and innovate a quick win. We look into the unseen aspect of the markets and take a strategic path to search for innovation and delivering a win-win-win products for the markets, which is for the user or buyer, producer or seller and even taking of the suppliers' win in every product we deliver to the markets."

**About Actchip**

Actchip is an India-based hardware design solutions company with over a decade of experience in electronics, embedded systems, and IoT product development. Founded by engineers with strong research backgrounds, Actchip drives innovation through differentiated and protectable technology development. The company delivers robust, reliable, and cost-optimized solutions that help Indian and global customers accelerate the journey from concept to scalable, production-ready products.

**About Dynamic Technologies**

Dynamic-Technologies.in or Dynamic Technologies is distributor and product Development Company primarily focus on locking and fastening devices and products. They serve pan spectrum industries right from Aviation to Agriculture, Digital Infra to Datacenters and much more, where utilization of locking or fastening is primarily important for components, systems to get access by the users. They are serving both domestic and international markets. They are in the market for more than decade innovating and proving a very reliable supplier in the products they produce and distribute.

**About FPC**

Fingerprint Cards AB (FPC) is a global biometrics leader, offering intelligent edge to cloud biometrics. We envision a secure, seamless world where you are the key to everything. Our solutions – trusted by enterprises, fintechs, and OEMs – power hundreds of millions of products, enabling billions of secure, convenient authentications daily across devices, cards, and digital platforms. From consumer electronics to cybersecurity and enterprise, our cloud-based identity management platforms support multiple biometric modalities, including fingerprints, iris, facial, and more. With improved security and user experience, we are driving the world to passwordless. Discover more at our [website](#) and follow us on [LinkedIn](#) and [X](#) for the latest updates. FPC is listed on Nasdaq Stockholm (FING B).
