NP Gruppen wins contract from Svenska Bostäder for roof replacement in Stockholm

The Soltech company NP Gruppen has been awarded a contract for the reconstruction of the roof on the Haren 4 property in Södermalm in Stockholm. The project is carried out for Svenska Bostäder and comprises three buildings at the addresses Brännkyrkagatan 68, 72 and 76 and is being carried out as a turnkey contract. The order value amounts to approximately SEK 10 million.

NP Gruppen is an established roofing and façade company with over 50 years of experience in the industry. The company's offering includes both roofing and façade contracts, with particular strength in sheet metal, waterproofing, roof painting and service and maintenance. They work with all types of roofs and have a clear focus on quality, high competence and long-term customer relationships, often within framework agreements.

The current assignment for the public housing company Svenska Bostäder involves the demolition and recycling of existing old roofing materials and the restoration of the roofs in their entirety, including safety management of asbestos. NP Gruppen then carries out the relaying with new underlay cardboard and a new metal roof. Each roof covers about 600 square meters, with a total roof area of about 1,800 square meters. The assignment also includes responsibility for applying for the necessary permits, scaffolding work, establishment and other elements that belong to the project.

"This is a great project and an acknowledgement that we are an attractive supplier in public procurements. The fact that we have received the trust of Svenska Bostäder shows that our expertise in complex turnkey contracts is valued, and I am proud of our employees whose work and expertise make it possible for us to take on assignments like this. We look forward to carrying out the work in close collaboration with the client," says **Niklas Hofsten, CEO of NP Gruppen**.
