Vimian Capital Markets Day 2026 – the road to 2030

Vimian Group AB (publ) today welcomes institutional investors, analysts and financial media to its Capital Markets Day in Stockholm. The program starts at 1:30 p.m. CET and will be available via a live webcast.

Vimian has built a global companion animal health company in fast-growing market niches by bringing together category-leading businesses within Specialty Pharma, MedTech, Veterinary Services and Diagnostics. Today the Group serves veterinary clinics and laboratories in more than 80 markets, with annual revenues of approximately EUR 467 million and an adjusted EBITA of EUR 114 million.

At the Capital Markets Day, management will present the strategy and roadmap for reaching the Group's financial target of an adjusted EBITA above EUR 300 million by 2030, as communicated on 8 March 2024. The financial target is reiterated and remains unchanged.

The four building blocks of value creation
The building blocks to reach EUR 300 million in adjusted EBITA by 2030 are:

1. A resilient and growing companion animal health market
2. On average 10 per cent organic revenue growth per year over the period
3. On average 10-15 per cent acquired revenue growth per year over the period
4. At least EUR 25 million in additional adjusted EBITA contribution from continued focus on AI, operational efficiency and economies of scale

The plan will be supported by strong operational cash generation, above 75 per cent on average over the period.

The building blocks describe the expected average development towards 2030 and do not constitute a forecast for any individual financial year.

A proven, repeatable business model
Vimian will describe its proven, repeatable business model to build a global leader in companion animal health. The model includes:

1. Identifying fast-growing and fragmented market niches with unmet medical needs within companion animal health.
2. Entering those niches through platform acquisition, enabled by a strong reputation as preferred home for entrepreneurs in companion animal health.
3. Driving strong, profitable growth through bolt-on acquisitions and organic initiatives focused on innovation, veterinary education and reach, making innovative products and services available to more veterinarians and pet owners around the world.
4. Stronger execution and operational efficiencies through scale and AI.

The Capital Markets Day is held at Epicenter Disruption Hall, Malmskillnadsgatan 44A in Stockholm, and is webcast live via https://vimian-group.events.inderes.com/cmd-2026. Participants on site and online will be able to ask questions. The presentation material will be available at www.vimian.com/investors, and a recording will be published after the event.
