NordAmps to participate in Ny Teknik's 33 List and Redeye Technology Day

On December 1, 2026, NordAmps AB (publ) ("NordAmps" or the "Company") will participate in two prominent Swedish technology events: Ny Teknik's 33 List and Redeye Technology Day. The events bring together leading representatives from Sweden's technology innovation, industrial and capital markets communities.

The 33 List is Ny Teknik's annual selection of Sweden's 33 most promising young and innovative technology companies, with a focus on proprietary technology and international potential.

This year, Redeye Technology Day focuses on Data Centers and Deep tech, two areas where advanced semiconductor technology plays a key role in meeting the growing demands for performance and energy efficiency.

NordAmps' participation in both events provides an opportunity to present the company's technology, commercial strategy and ambition to combine the performance advantages of advanced semiconductor materials with the established volume manufacturing capabilities of the silicon industry.
