## Enea Named Winner of Global InfoSec Award during RSA Conference 2021

Enea is pleased to announce it has won the Editor's Choice award for Embedded Security in the Global InfoSec Awards for 2021, an annual competition hosted by Cyber Defense Magazine, the industry's leading electronic information security magazine. The Global InfoSec Awards recognize the most innovative, forward-thinking and proactive cybersecurity companies and service providers. This year, Enea was honored to be recognized for its flagship product for embedded network traffic intelligence, the Enea Qosmos ixEngine®.

Qosmos ixEngine is trusted by leading cybersecurity vendors to deliver the granular, real-time network traffic intelligence needed for early detection of breaches, threats, and suspicious behavior, and to support advanced analytics for security orchestration and automation.

Long valued for its extensive protocol recognition, unique security metadata and industry-leading accuracy, Qosmos ixEngine is also valued for continuous innovation, as reflected in new features like First Packet Advantage, a first packet processing system with unmatched accuracy and application recognition.

"We're proud to join the distinguished companies recognized in this year's awards from Cyber Defense Magazine. Several of these winners use our embedded software, and we look forward to many more years of innovation alongside with them," said Jean-Philippe Lion, Senior Vice President of the Enterprise Business Unit at Enea.

You can join Cyber Defense Magazine virtually at [cyberdefenseawards.com](https://cyberdefenseawards.com) to share their red-carpet experience for this year's winners.

If you are attending the [RSA Conference 2021](https://path.rsaconference.com/flow/rsac/us21/rsacus21marketplace/page/marketplace/exhibitor/1615230194443001C0kH), we invite you to visit Enea in the RSA Marketplace at <https://path.rsaconference.com/flow/rsac/us21/rsacus21marketplace/page/marketplace/exhibitor/1615230194443001C0kH>
