

Elliptic Labs Unveils New AI Virtual Tap to Pair Sensor CES 2025

Connecting Your Accessories Has Never Been This Easy—Just Tap and Go!

Oslo, Norway -- [Elliptic Labs](#) (OSE: [ELABS](#)), a global AI software company and the world leader in AI Virtual Smart Sensors™ currently deployed in over 500 million devices, will be unveiling its latest AI Virtual Smart Sensor, the AI Virtual Tap to Pair Sensor, at CES 2025. The AI Virtual Tap to Pair Sensor brings seamless connectivity between PC peripherals (e.g. mice, keyboards, earbuds and headphones, etc.) and Windows laptops, just with a simple tap of the device against the side of the laptop's display.

With our AI Virtual Tap-to-Pair Sensor, users can eliminate the need for cumbersome USB dongles and enjoy a consistent Bluetooth experience. This innovation simplifies the pairing process for accessories like mice, earbuds, and keyboards by enabling a seamless connection through a simple tap against the side of the laptop. The pairing process is automatically initiated, ensuring quick and effortless connectivity without the hassle of manually navigating Bluetooth settings—just a touch is all it takes.

"We've taken the frustration out of pairing devices and replaced it with a seamless, intuitive experience that feels almost like magic. Our software-only AI Virtual Tap-to-Pair Sensor delivers a smarter, faster, and more enjoyable way to connect," says Laila Danielsen, CEO at Elliptic Labs

For live demos come visit Elliptic Labs at CES 2025 – our booth is located at:
Tech West, Venetian Expo, Eureka Park, Level 1, Hall G and Meeting Rooms, Booth 60633 (Stand 5).

About Elliptic Labs

Elliptic Labs' AI Virtual Smart Sensor Platform™ brings contextual intelligence to devices, enhancing user experiences. Our technology uses proprietary deep neural networks to create AI-powered Virtual Smart Sensors that improve personalization, privacy, and productivity.

Currently deployed in over 500 million devices, our platform works across all devices, operating systems, platforms, and applications. By utilizing system-level telemetry data to cloud-based Large Language Models (LLMs), the AI Virtual Smart Sensor Platform delivers the unrivaled capability to utilize output data from every available data source. This approach allows devices to better understand and respond to their environment, making technology more intuitive and user-friendly. At Elliptic Labs, we're not just adapting to the future of technology – we're actively shaping it. Our goal is to continue pushing the boundaries of contextual intelligence, creating more intuitive and powerful experiences for users worldwide.

Elliptic Labs is headquartered in Norway with presence in the USA, China, South-Korea, Taiwan, and Japan. The company is listed on the Oslo Stock Exchange. Its technology and IP are developed in Norway and are solely owned by the company.

Trademark

INNER BEAUTY is a registered trademark of Elliptic Labs.

AI Virtual Smart Sensor, AI Virtual Smart Sensor Platform, AI Virtual Proximity Sensor, AI Virtual Presence Sensor, AI Virtual Connection Sensor, AI Virtual Gesture Sensor, AI Virtual Heartbeat Sensor, and AI Virtual Breathing Sensor are trademarks of Elliptic Labs.

All other trademarks or service markets are the responsibility of their respective organizations.
