

BREAKTHROUGH IN A FAST-GROWING MARKET: OPTICEPT SECURES SEK 2 MILLION ORDER IN AVOCADO OIL EXTRACTION

OptiCept Technologies AB (publ) has received an order from Avolio Industries Ltd. for a CEPT® system for avocado oil extraction. The order value amounts to approximately SEK 2 million, with delivery scheduled for autumn 2025.

Avolio Industries Ltd, part of Del Monte, is based in Uganda. Avolio is a leading producer of cold-pressed avocado oil. The company focuses on sustainable and chemical-free production and exports to markets in Europe, North America, and Asia.

"We are very pleased to have earned the trust of Avolio Industries. Avocado oil is a fast-growing market with great potential. The process is very similar to olive oil extraction – an area where we already have strong expertise. Therefore, we see great opportunities for rapid expansion in this segment as well," says Thomas Lundqvist, CEO of OptiCept Technologies.

The ordered system is based on OptiCept's patented Pulsed Electric Field (PEF) technology and is specifically designed for processing liquid, pumpable food products. This technology enables higher yield, improved quality, and more sustainable food production.

According to industry reports, the avocado oil market is valued at approximately USD 13.05 billion (2024), with a projected annual growth rate (CAGR) of 8.54% through 2031. This growth is driven by increasing demand from health-conscious consumers and the trend toward natural, nutrient-rich foods.

About Us

OptiCept Technologies AB (publ) provides the food and plant industry with technological solutions that contribute to a more sustainable world and enable climate-smart economic growth. OptiCept optimizes biological processes - Increased extraction from raw material, extended shelf life, reduced waste, and improved quality (taste, aroma, color, nutritional content) of the final product.

The positive effects of technology increase efficiency for our customers, provide better products for the consumers, and minimal impact on our environment. Through patented technology in PEF (pulsed electric field) and VI (Vacuum Infusion), the technology opens up new business opportunities for the food and plant industry worldwide. OptiCept's vision is to contribute to a sustainable world by offering efficient, green, cutting-edge technology that is easy to use in the areas of FoodTech and PlantTech.

The company is located in Lund and the share is traded on the Nasdaq First North Growth Market (ticker: OPTI). The Company's Certified Adviser is DNB Carnegie Investment Bank AB.
