

PRESSRELEASE April 20, 2026

PROACT'S FIRST-QUARTER 2026 RESULTS BETTER THAN EXPECTED

Proact IT Group AB (publ) today announces that the company's results for the first quarter of 2026 are expected to be significantly better than anticipated. The positive deviation is explained by a combination of a higher gross margin driven by temporary market conditions, as well as improved profitability following implemented cost-efficiency measures.

The company's preliminary review of the results for the period indicates that adjusted EBITA amounts to approximately SEK 110–120 million (79), corresponding to an EBITA margin of 9–9.5 percent (6.5).

Market conditions during the quarter have been characterized by sharp price increases in memory components as a result of extensive global investments in AI.

The figures presented in this press release are preliminary and have not been subject to audit. The final outcome may differ once the reporting process has been completed.

Proact will publish its interim report for the first quarter of 2026 on May 5 at 08:00 CET.
