## Ovzon collaborates with French Government to enable security at Summer Games

**In a fully collaborative effort, Ovzon will deliver its integrated SATCOM-as-a-Service solution, including mobile satellite terminals On-The-Pause and On-The-Move, capacity on the high-performing Ovzon 3 satellite, teleport service, and 24/7 dedicated service and support, to a key French government agency tasked with providing security for the 2024 Summer Games.**

The Groupe d'intervention de la Gendarmerie nationale (GIGN) will be on the highest alert at multiple locations around France to ensure the security of the Summer Games. Ovzon's proprietary new satellite, Ovzon 3, will be a key enabler of GIGN's critical missions, providing trusted, resilient connectivity throughout the Summer Games.

"Ovzon's advanced mobile satellite terminals and high-performing satellite will support different scenarios and users around the Paris area. Ovzon's technology and experience is a great match for our needs, and we are looking forward to implementing their SATCOM-as-a-Service," says General Ghislain Réty, GIGN Commander.

"This is a perfect opportunity to demonstrate the capabilities of our new satellite, Ovzon 3, and the full range of our SATCOM-as-a-Service solutions. We fully appreciate the importance of this mission, and Ovzon's guaranteed satellite connectivity for both mobile and fixed applications is up to the task," explains Orson Storar, VP of Sales Europe at Ovzon.

Per Norén, CEO of Ovzon, concludes, "It is our great honor to support this well-renowned French government agency. We are 100% dedicated to supporting their mission-critical requirements for uninterrupted resilient connectivity in Paris this summer."

### **About Ovzon**

Ovzon offers world-leading integrated mobile satellite communications services, SATCOM-as-a-Service, to customers globally. The services combine high throughput satellite networks, mobile satellite terminals, gateway services, and dedicated customer support. Ovzon's offerings meet the growing demand for mission critical connectivity for customers with high performance, mobility and resiliency requirements such as Defense, National security and Public safety. In January 2024, Ovzon's proprietary developed geostationary satellite Ovzon 3 was successfully launched from Cape Canaveral, FL. Founded in 2006, Ovzon has offices in Stockholm, Sweden as well as Herndon, VA and Tampa, FL in the USA. Ovzon is listed on Nasdaq Stockholm Small Cap.
