

Home energy storage becomes more accessible – Polarium Home ready for delivery across the Nordics via KP Energy's distribution network

Polarium, a leader in energy storage solutions, announced today that its home energy storage system, Polarium Home, is now available for order through KP Energy's distribution network across the Nordic region.

The announcement marks the next step in the strategic partnership between Polarium and KP Energy. KP Energy is one of the Nordics' leading wholesalers of solar energy, EV charging, and energy storage. Thanks to their strong market presence, it is now easier for installers and resellers to offer households across the region a ready-to-deliver solution for smart energy storage.

"Having Polarium Home in stock together with KP Energy is an important milestone in our commitment to the Nordic market. It means we can meet the strong demand from both installers and households who want to take control of their energy use while contributing to a more sustainable energy system," said Eric Ekberg, EVP Business Area Residential at Polarium.

Fast access to a European-developed solution

Polarium Home is developed and designed in Sweden, combining modern hardware with intelligent software to provide households with flexibility and reliability in storing and optimizing their self-produced energy. The system is easily scalable to match household needs and is built to seamlessly integrate with solar panels and EV charging.

"We see very strong interest from our customers, and now that the product is in stock, we can offer fast delivery throughout the Nordics. For us, it is a great advantage to be able to provide an energy storage solution that is developed in Europe and that meets high standards both technically and aesthetically," said Fredrik Stake, Chief Product Officer at KP Energy.

About KP Energy

KP Energy is one of the Nordic region's leading wholesalers in renewable energy, with extensive experience and broad expertise. The company was founded in Västerås in 2012 under the name *Kraftpojkarna* by six local entrepreneurs, with a clear focus on solar PV systems and energy services. Since then, KP Energy has grown into a trusted wholesaler of solar energy, EV charging, and energy storage – with the goal of helping the energy industry accelerate the transition in a simple and renewable way. KP Energy has been part of OKQ8 Scandinavia since 2019 and supplies materials to hundreds of resellers throughout the Nordic region.

About Polarium

Polarium is a leading energy storage developer. We make energy storage and optimization solutions built on lithium-ion battery technology for businesses within telecom, commercial, industrial and residential facilities across the world. Polarium was founded in 2015 on the conviction that safe, smart and sustainable energy storage solutions will be key to empower the transition to a truly sustainable energy future. We are an impact business contributing to the

sustainable energy transformation by enabling renewables, electrification and intermittent power supply. Our cutting-edge and easily adaptable modular battery technology enables us to be in the forefront of developing state-of-the-art sustainable energy storage and optimization solutions for today – and tomorrow. Polarium is an entrepreneurial company headquartered in Stockholm, and customers across the world.
