

BIMObject AB has achieved a milestone of 1 million new registered users in just under 11 months

BIMObject AB (publ) has gained more than 1 million new registered users on its platform bimobject.com over the past 11 months, corresponding to a growth rate exceeding 20 percent and reaching a total of 6 million accumulated registered users. This is the fastest growth of 1 million new registered users in the company's history.

The growth has been achieved organically and reflects continued demand for BIMObject's digital product information and services among construction professionals globally. The expanding user base strengthens the platform's position as a key channel for manufacturers to reach architects and engineers at an early stage in construction projects.

"The strong organic growth in registered users demonstrates the continued relevance of our platform in a rapidly digitalizing construction industry," says Sofia Hylén, interim CEO of BIMObject AB.

BIMObject keeps strengthening its global platform for digital building product information by leveraging commercial synergies within its product range, as well as through continued product development.
