

FPC AllKey Pro Selected for Mettlesemi's Next-Generation FIDO2 Certified Authenticators

Karnataka, India & Gothenburg, Sweden – December 10, 2025 – Fingerprint Cards AB (FPC) today announces that its biometric system, FPC AllKey Pro, has been selected for the next generation of Mettlesemi's Vishwaas FIDO2-certified Authenticators, scheduled for launch in Q2 2026. This design-win marks another important milestone in FPC's growing momentum in the Indian market, where the company is seeing strong adoption of its biometric technologies across multiple modalities and product categories.

Mettlesemi recently introduced its latest Vishwaas FIDO2 authenticator featuring FPC's BM-Lite fingerprint system, in either the Vishwaas Eagle or Vishwaas Hawk variants, offering USB-A, USB-C, and NFC connectivity to meet the needs of demanding enterprise security environments. Entirely Made in India, the product supports India's strategic focus on secure, domestically produced trust technologies. Building on the success of this first-generation device, Mettlesemi is now elevating performance and security further by incorporating FPC AllKey Pro.

FPC AllKey Pro is engineered to simplify biometrics deployment, delivering robust biometric authentication, advanced cryptographic security features, and compact integration capabilities. Its selection for the next-generation Mettlesemi Vishwaas platform reflects the value it brings to OEMs seeking to accelerate time-to-market while maintaining the highest security standards. This latest product integration represents continued evidence of commercial traction in India, one of the world's fastest-growing digital identity and authentication markets. It also reinforces the relevance of the AllKey product family as a scalable platform for biometric-enabled security devices.

Adam Philpott, CEO of FPC, comments:

"This design-win with Mettlesemi is further proof of the strong and expanding footprint FPC is building in India. Following the successful introduction of their first FIDO2 authenticator powered by our BM-Lite sensor, we're delighted that Mettlesemi has chosen AllKey Pro for its next-generation product. This partnership underscores the trust placed in our biometric technology and the strength of our roadmap as we continue enabling secure, user-friendly authentication solutions globally."

Sriram Rajagoplan, CEO of Mettlesemi Systems and Technologies, added:

"We're delighted to partner with FPC to integrate AllKey Pro into the next-generation Mettlesemi Vishwaas authenticators. Its compact, high-performance biometric module strengthens our tamper-proof, FIDO2 architecture, accelerates time-to-market, and delivers seamless, passwordless security for enterprise and government deployments—supporting India's focus on trusted, domestically produced authentication technologies."

The collaboration strengthens the long-term partnership between the two companies and supports India's growing demand for strong, hardware-based authentication, driven by enterprise security needs, digital transformation initiatives, and the global shift towards passwordless login standards.

About FPC

Fingerprint Cards AB (FPC) is a global biometrics leader, offering intelligent edge to cloud biometrics. We envision a secure, seamless world where you are the key to everything. Our solutions – trusted by enterprises, fintechs, and OEMs – power hundreds of millions of products, enabling billions of secure, convenient authentications daily across devices, cards, and digital platforms. From consumer electronics to cybersecurity and enterprise, our cloud-based identity management platforms support multiple biometric modalities, including fingerprints, iris, facial, and more. With improved security and user experience, we are driving the world to passwordless. Discover more at our [website](#) and follow us on [LinkedIn](#) and [X](#) for the latest updates. FPC is listed on Nasdaq Stockholm (FING B).

About Mettlesemi Technologies and Systems Private Limited

Mettlesemi Systems and Technologies Pvt. Ltd. is a Bangalore-based deep-tech enterprise driven by a mission to shape the future of secure electronics and hardware innovation through breakthrough products, platforms, and design services. With a strong focus on semiconductor design, embedded systems, cybersecurity, and fintech, we deliver world-class, Made-in-India solutions that are trusted across industries. Visit us at www.mettlesemi.com to know more about our products and solutions.
