Sdipotech acquires UK-based Eagle Automation Systems

Sdipotech AB (publ) has acquired all shares in Eagle Automation Systems Ltd (Eagle). The company designs, manufactures and assembles high-quality perimeter security- and hostile vehicle mitigation (HVM) products with the highest security and loss prevention standards for the UK and international markets. Eagle Automation Systems has an annual EBIT of approximately GBP 2 million.

Founded in 1998, the company is one of the largest suppliers of hostile vehicle mitigation (HVM) gates in the UK, operating out of its headquarters in Essex, England. Eagle has become a one-stop shop for physical perimeter security, offering a broad range of HVM solutions tailored to high-security environments. Eagle's expertise in HVM gates positions them as a critical partner for both commercial and government clients seeking enhanced security measures.

"Eagle's strong reputation as a complete HVM solution provider, to public spaces, industrial- and high security sectors, aligns perfectly with Sdipotech's mission to contribute to safer societies", says **Johan Lahiri, Business Unit Manager, Special Infrastructure Solutions at Sdipotech.**

The global market for perimeter security and HVM is expected to continue its expansion, with a growing emphasis on integrated solutions that combine physical and technological measures, such as automated gates, barriers, and surveillance systems. Eagle's position as a trusted provider of high-quality solutions places it in a favorable position to capitalize on these trends.

"As security threats continue to increase, particularly around vehicle-based risks, Eagle remains committed to delivering best-in-class solutions that protect people and property. This partnership with Sdipotech will allow us to expand our international footprint and continue to innovate in the field of hostile vehicle mitigation", says **David Ashby, CEO at Eagle Automation Systems.**

The acquisition of Eagle supports Sdipotech's vision of enhancing safety and sustainability across key infrastructure sectors. The company is Sdipotech's fourteenth business unit in UK and will be included in the business area Special Infrastructure Solutions as of October 2024.
