

# Konsolidator expands its offerings with Konsolidator AI Insight

Company Announcement no. 3/2026 (June 25, 2026)

## **Konsolidator introduces Konsolidator AI Insight, giving group finance teams a way to “talk” directly with their financial data within the company’s data management solution.**

For finance teams, the challenge is no longer access to data, but turning reliable data into answers quickly, securely, and without adding manual work. While many AI solutions focus on improving existing processes, Konsolidator AI Insight is designed to provide a more direct way to work with financial data without compromising security.

With Konsolidator AI Insight, CFOs, group controllers, and FP&A teams can ask questions in natural language and receive explanations, analyses, and overviews based on their own financial data. Instead of waiting for custom BI reports or manually piecing together numbers from different sources, finance teams get a faster route from reliable data to valuable insights.

**Claus Finderup Grove says,** *“Finance teams don’t need more data or more reports; they need flexible and efficient ways to get answers. With Konsolidator AI Insight, we give customers a simpler way to work directly with their own data. For example, a prompt to Konsolidator AI Insight could be: “I’m attending a meeting with the board that focuses on the commercial aspect as well as the cash flow forecast. Please give me an overview of performance and other insights in this regard.”* **he continues,** *“that’s a clear shift from how many teams still work today, where insights often depend on manual data gathering and consolidation.”*

## **Builds bridge between controlled financial data and finance professionals utilizing MCP**

Built on Microsoft Fabric, AI Insights is based on a modern and scalable data platform. This gives customers access to continuously evolving AI and data capabilities from Microsoft, while keeping financial data structured, governed, and close to the reporting process.

By integrating the Model Context Protocol (MCP), Konsolidator creates a secure, standardized bridge between your financial data and the AI. This open-standard architecture supports the use of different large language models (LLMs), allowing customers to choose the setup that fits their requirements while maintaining full control over their data.

Because Konsolidator AI Insight works with financial and business-critical data, compliance, security, and data control are central to the solution. The functionality is designed for customers using Konsolidator’s data management solution, the company’s data lakehouse, and allows customer data to be used in a controlled environment without being sent to or used for training external models.

### **A strategic step in the Konsolidator Suite**

The introduction of Konsolidator AI Insight strengthens the value of Konsolidator's data warehouse solution and supports the company's broader platform strategy. Konsolidator has expanded from a consolidation tool into a finance suite covering consolidation, financial data management, analytics, and financial planning, while remaining anchored in reliable, structured, and auditable financial data.

For customers, Konsolidator AI Insight adds a new way to work with financial data. For Konsolidator, it makes the data warehouse solution more valuable as the foundation for future finance workflows, reporting, and analysis.

### **About Us**

Konsolidator A/S is a cloud-based financial consolidation and reporting software provider dedicated to making group CFOs better with fast, reliable, and compliant financial data. Founded by a former CFO and an auditor, the solution eliminates manual processes and supports strategic decision-making. Built to scale with growing organizations, Konsolidator integrates seamlessly into the group's financial ecosystem. Through the Konsolidator Suite, the company offers a financial data warehouse and FP&A capabilities besides their consolidation solution, and partners with other best-in-class tools to support a holistic finance function. Konsolidator was listed on Nasdaq First North Growth Market Denmark in 2019. Ticker Code: KONSOL
