

## New Patent Granted-Russian Federation

We have received approval from the Russian Federal Service for Intellectual Property on our "Microspheres of Hydrolysed Starch with Endogenous, Charged Ligands" patent application. Together with our other existing patents, we are extending our portfolio scope of protection of our technology to provide an added layer of security of our pipeline development and future products. The grant of that patent provides further recognition of the quality of the innovation being carried out by Magle Chemoswed's team.
