

Region Blekinge awards Ortivus a contract on the delivery of equipment to the region's ambulance operations

We are pleased to announce that Ortivus and Region Blekinge have entered an agreement regarding the delivery of MobiMed Life defibrillators as well as the latest generation MobiMed Monitor to the region's ambulance operations. The order value is estimated to 4.5 MSEK.

Region Blekinge, which has been an Ortivus' customer for several years, has once again chosen Ortivus as the preferred supplier for its pre-hospital care. Region Blekinge has previously been using MobiMed Monitor in its daily operations and with this contract award, they are expanding with MobiMed Life defibrillators.

The contract covers 28 manual defibrillators of the model Reanibex 500 as well as upgraded equipment for MobiMed Monitor e.g., new hardware, new carrying systems, docking stations for vehicles, and measuring units.

"Region Blekinge has been our customer for many years and we are very pleased to see that their trust in Ortivus is strong. We look forward to a continued good collaboration." Says Elias Obaid, Sales Manager at Ortivus.

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 3.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
