

Press release, March 21, 2025

ProfilGruppen manufactures in Poland

In February ProfilGruppen informed that an acquisition process regarding an extrusion operation in Poland has been initiated.

A Polish subsidiary, ProfilGruppen Spółka z. o. o, has been established. The subsidiary has entered into a lease agreement in March, which includes the production facilities and employs approximately 80 personnel from the previous operation. The previous operating manager, Dorota Spychała, will be the manager on site. The operation is located in the town Wałcz, 220 km southwest of Gdansk.

Production and delivery of aluminium profiles from the Polish subsidiary of ProfilGruppen has recently been initiated.

The acquisition is still dependent on the reconstruction process, and we do not control the timeline and decisions for this.

ProfilGruppen will use its unique possibilities and complementary resources to re-build and develop the Polish business. Several of our customers and suppliers already have businesses in both countries. A collaboration has started up between our Swedish business and our Polish subsidiary.
