

Interview Series: Voices from Neonatal Care – Linda Nilsson, intensive care nurse in Lund

In the first part of our interview series, we meet Linda Nilsson, an intensive care nurse at Skåne University Hospital in Lund. She emphasizes the critical importance of early detection and continuous monitoring in the acute phase of neonatal care, where even small changes in a newborn's condition can signal serious complications.

We also hear from Veronica Hermansson, a specialist physiotherapist at the Pediatric Clinic at Södra Älvsborgs Hospital in Borås, who highlights the long-term challenges faced by preterm born babies. Their immature brains make them especially vulnerable to neurodevelopmental issues, requiring careful support beyond the neonatal period.

Together, their perspectives illustrate the complexity of neonatal care, from intensive care in the first hours of life to long-term developmental support, and the need for a comprehensive, lifelong approach for this vulnerable patient group.

You can read the full interview with Linda Nilsson in the attached file below.

About Neola Medical

Neola Medical AB (publ) develops an innovative medical technology device for non-invasive, continuous lung monitoring and real-time alerts of potentially life-threatening lung complications in preterm born babies. By enabling instant detection, the technology aims to support earlier intervention, improve clinical decision-making, enhance long-term outcomes, and ultimately contribute to saving lives. The patented, cutting-edge technology was developed at Lund University in Sweden and is based on a spectroscopic method that measures changes in lung volume and oxygen gas concentration. Neola Medical builds on Sweden's longstanding legacy of medical technology innovation and contributions to global health care. Neola Medical was founded in 2016 and is listed on NASDAQ First North Growth Market (ticker: NEOLA). Read more at www.neolamedical.com. The company's Certified Adviser is FNCA Sweden AB.
