

Physitrack EMR early access reaches 480 clinic signups representing over 4,700 clinicians

Physitrack's new EMR has attracted signups from 480 clinics representing over 4,700 clinicians ahead of its wider launch on 2 November 2026. A Physi Campus development sprint beginning on 13 November will accelerate revenue cycle management and reporting capabilities, targeted for release in early December. Paid subscriptions remain on track to commence in January 2027.

New York, October 17, 2026

Physitrack PLC announces that 480 clinics, representing over 4,800 clinicians, have signed up for its new Physitrack EMR ahead of the wider launch scheduled for 2 November 2026.

The signup figures demonstrate strong early interest in Physitrack's AI-powered electronic medical record platform, designed to simplify clinic workflows, reduce administration and connect clinical care with patient engagement.

To accelerate the development of Physitrack EMR's insurance revenue cycle management and clinical reporting capabilities, Physitrack will begin another PhysiCampus residential development sprint on 13 November. The sprint will bring the Product, Engineering and Growth teams together for an intensive period of development, with these additional components targeted for release in early December.

The company remains on track to commence paid subscriptions in January 2027.

Henrik Molin, CEO and co-founder of Physitrack, comments:

"Having 480 clinics representing over 4,700 clinicians signed up ahead of our wider launch is an encouraging indication of demand. We built Physitrack EMR around the people using it, helping clinicians spend less time on administration and more time with patients.

"Our next PhysiCampus will focus on accelerating revenue cycle management and reporting, which are central to how clinics get paid for their services and run their businesses. With these components targeted for early December, we remain on track to begin paid subscriptions in January."

Key milestones

- 2 November 2026: Wider launch of Physitrack EMR
- 13 November 2026: Next Physi Campus development sprint begins
- Early December 2026: Targeted release of revenue cycle management and reporting components
- January 2027: Paid subscriptions scheduled to commence
