

PRESS RELEASE

September 16, 2024

Ziccum announces trademarking LaminarPace in the USA

Ziccum is pleased to announce that the appellation of its proprietary technology, LaminarPace, has been officially registered with the United States Patent and Trademark Office (USPTO) as a trademark since 23 July 2024. Obtaining trademark protection in the US, a market of primary importance to Ziccum, is a significant step in light of Ziccum's growing industry presence, recognition as a commercial partner of choice, and Ziccum's continuous scientific progress.

In addition to trademarking LaminarPace the company also received trademark registration for the company name Ziccum by USPTO. The trademarks are valid for 10 years from the priority date associated with the filing of the trademark applications with the USPTO (10 November 2022), and they can then be renewed.

Ziccum applied in 2022 for trademark protection in all the relevant geographical territories for pharmaceutical markets to ensure full protection for the LaminarPace and Ziccum names. The US approval is the first registration obtained.

Ann Gidner, CEO: "As we are gaining growing industrial recognition in the international pharmaceutical industry, it is important to protect the LaminarPace and Ziccum names and their increasing brand value. We are happy to get the formal registration completed for the United States and look forward to receiving further territory approvals ahead".

About Ziccum

Ziccum is developing LaminarPace™, a unique drying method for biopharmaceuticals and vaccines based on mass transfer, not heat transfer. The technology is offered by licensing to vaccine and biologics developers and manufacturers in the global pharmaceutical industry. By reducing drying stress to the active ingredient, LaminarPace™ uniquely enables particle-engineered, thermostable dry powder biopharmaceuticals which can be easily handled and transported and are highly suitable for novel administration routes. The technology has been successfully applied to mRNA, peptides, proteins, antibodies, lipids and enzymes as well as excipients and adjuvants, and is well suited for industrial application. Ziccum is listed on the Nasdaq First North Growth Market.
