

Maven Wireless granted a third patent in South Korea

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted one new patent in South Korea

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique, future-proof and supports all relevant technologies from 2G to 5G as well as blue light services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary technology.

Including the new granted patent, Maven Wireless possesses 58 patents worldwide and has additionally 13 patent applications pending. The new patent in South Korea covers key elements on how the Distributed Antenna System (DAS) equipment automatically configure itself depending on external environment as well as how to make the DAS redundant and resilient. This patent supports and protects Maven Wireless' business globally.
