

MVW: M VEST WATER AWARDED CONTRACT FROM DOWNSTREAM MARINE AS

Bergen, Norway, December 12, 2024 – M Vest Water (EURONEXT: MVW) today announced that it has signed a contract for delivery of water treatment equipment to Downstream Marine AS (DSM), Norway.

The equipment is to be delivered to a salmon slaughterhouse in Norway and comprises a flotation unit and a system prepared for dosing of our natural water treatment chemical NORWAFLOC®.

This new and modern treatment plant will be operational in the end of 2025.

The excellent collaboration with DSM has resulted in a total of five equipment deliveries. This positions MVW as the preferred supplier of BAT solutions for the treatment of salmon slaughterhouse wastewater.

“Yet another salmon slaughterhouse is making the necessary investments to prepare its process plant for chemical treatment of blood water to meet the new restricted discharge regulations in Norway. MVW also expects additional recurring revenues from NORWAFLOC® sales,” comments MVW’s Executive Chairman Tor Olav Gabrielsen.
