

Acconeer receives USD 1.5 million order for level sensing

The order relates to the XM132 module and comes from a US-based, global leader in design and manufacturing of liquid level gauges and sensors. Delivery is planned continuously until end of 2027.

CCO Michel Roig comments: "This is our largest order to date outside the automotive industry, and it reinforces our strong and growing position in the level measurement segment. It confirms the strength and competitiveness of our high performance low-powered technology, for which we continue to see increasing demand."

In addition to publicly announced orders, Acconeer continuously receives orders of smaller amounts which are not publicly announced as they are not considered to affect the share price.

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye Nordic Growth AB is the company's Certified Advisor (CA). For more information: www.acconeer.com.
