Humana Finland expands its pipeline for organic growth

Over the past year, Humana has strengthened its focus on organic growth, including a strengthened sales organization in Finland. The expansion is primarily driven by demand within disability, and a pipeline for new units has been built up corresponding to annual revenue of approximately SEK 270 million.

Humana Finland is accelerating its growth rate and has signed lease agreements for new units during the years 2027-2029 with a total expected annual revenue of approximately SEK 270 million. The new units will expand all of Humana Finland's service areas, with a majority in disability. In addition, there will be replacements of existing old properties with modern and environmentally friendly care properties.

-Our growth plan in the coming years will be based on strategic new projects, diversification of the service offering and replacement of old properties, says Leila Rutanen, President of Humana Finland.
