

Welcome to IRLAB's Capital Markets Day 2022

IRLAB (Nasdaq Stockholm: IRLAB A) will host a capital markets day on Tuesday March 22, 2022, in Stockholm to present the company's strategies, growth plan and key assets.

The Capital Markets Day will be held at 12:15 CET on March 22, 2022, at Helio G30, Grev Turegatan 30, in Stockholm.

The program will provide an update on IRLAB's long-term strategy and an external perspective on IRLAB's projects and drug candidates. Mats Thoren, a seasoned investor and analyst within life science, will moderate. Representatives from IRLAB's management team will be available for discussions.

A detailed agenda and a link for lunch registration follows.

12.15 – 13.00 Standing lunch

13.00 – 13.30 Introduction, strategy and growth

Introduction - Mats Thoren

Strategy and growth - CEO IRLAB, Dr Nicholas Waters

About IRLAB

IRLAB is a Swedish research and development company that focuses on discovery and development of novel treatments in Parkinson's disease. The company's most advanced drug candidates, Mesdopetam (IRL790), licensed to Ipsen, and Pirepemat (IRL752), have completed Phase IIa studies and are designed to treat some of the most difficult symptoms related to Parkinson's disease: involuntary movements (PD-LIDs), psychosis (PD-P) and symptoms linked to cognitive decline such as impaired balance and increased risk of falls (PD-Falls). Through its proprietary research platform, the Integrative Screening Process (ISP), IRLAB has discovered and developed all its projects within Parkinson's disease and will have an ability to also discover drug candidates for other disorders of the central nervous system (CNS), where large and growing medical needs exist. In addition to the Phase IIb clinical candidates, the ISP platform has also generated several CNS programs that are now in preclinical phases. IRLAB is listed on Nasdaq Stockholm Main Market. More information is found on www.irlab.se.
