

Enersize strengthens its position in the pharmaceutical industry – awarded renewed trust for energy efficiency in steam and compressed air systems

Following documented results in a previous assignment, Enersize has been awarded renewed trust by a leading pharmaceutical company to continue optimizing energy use in both steam and compressed air systems. The focus is on reducing energy consumption, increasing operational reliability, and further lowering the environmental footprint of the company's production facilities.

The new agreement extends a successful collaboration that has already resulted in substantial energy savings, lower operating costs, and reduced CO₂ emissions. The assignment includes continued preventive maintenance of the steam system, as well as advanced monitoring and leak detection in the compressed air system; all to ensure long-term sustainable and cost-efficient operations.

– Being entrusted to continue this collaboration is a strong confirmation that our solutions deliver tangible results, both financially and environmentally. Together with the customer, we have demonstrated that high operational reliability and measurable energy efficiency improvements can go hand in hand, says Fredrik Arrigucci, CEO of Enersize.

For the pharmaceutical industry, where production reliability and quality are critical, energy efficiency is not only an environmental priority but also a strategic investment that strengthens both competitiveness and sustainability performance.

– By combining technical expertise with a holistic view of energy, we help our customers produce more with fewer resources, while taking important steps toward their climate goals, Arrigucci concludes.

About Enersize

Enersize develops and provides specialized software, tools, and services for improving energy efficiency in industrial compressed air systems – one of the most energy-intensive processes in manufacturing. The company's technology platform enables detailed monitoring, analysis, and real-time optimization of compressed air systems, with the aim of reducing energy consumption, detecting leaks, and improving operational performance.

Enersize works with a wide range of industrial companies that recognize energy efficiency as a strategic priority – both for improving financial performance and for reducing environmental impact. The solutions are scalable and designed to integrate seamlessly into both existing and new system environments.

The company is listed on Nasdaq Stockholm First North Growth Market under the ticker: ENERS.
