

Devyser wins tender for cystic fibrosis in Italy

Devyser has been awarded a tender for Devyser's CFTR fragment analysis products, that are used for screening and confirmation of cystic fibrosis. The tender with the University Hospital in Verona is valid for a period of twelve months. Indicative order value is estimated to amount to approximately 1,5 million SEK.

"The tender strengthens our already strong position in the Italian market, and I am very proud of the entire team who made this happen", says CEO Fredrik Alpsten. "This tender is another confirmation of the competitiveness of our high quality and simple *CFTR* genetic analysis solutions."

Devyser's CFTR fragment analysis kits captures the most frequent cystic fibrosis gene (CFTR) mutations in a single assay that is purpose-designed for fast and efficient lab processing.
