Enea Signs Contract worth USD 3.5 Million for Traffic Classification

Enea has signed an agreement with a total value of USD 3.5 million over six years, covering embedded traffic classification software for a global North American vendor of cloud networking solutions for large data center and campus environments.

The agreement covers new business with an existing customer of Qosmos ixEngine, an advanced traffic classification engine that recognizes over 3500 protocols, more than any other on the market. The cloud networking vendor will embed Qosmos ixEngine in its intelligent SD-WAN solution to provide granular traffic information used for WAN optimization, Quality of Service (QoS), firewalling, and reporting.
