

Elliptic Labs Announces Nine Smartphone Model Shipments with Transsion, vivo, HONOR, and Xiaomi for April 2025

Oslo, Norway --- [Elliptic Labs](#) (OSE: [ELABS](#)), a global AI software company and the world leader in AI Virtual Smart Sensors™ currently deployed in over half a billion devices, has shipped its AI Virtual Smart Sensor Platform™ on nine smartphone models in April 2025. Xiaomi launched three smartphones: [Redmi Turbo 4 Pro](#), [Redmi Note 14S](#) and [14 Pro Smartphones](#). vivo also shipped three smartphones: [vivo Y300 Pro+ Smartphone](#), the [vivo IQOO Z10](#) and [vivo T4 Smartphones](#). HONOR shipped two smartphones: [HONOR Power](#) and [HONOR X60GT](#). Transsion shipped one smartphone – the [Infinix Note 50S 5G+ Smartphone](#). For 2025 year-to-date, Elliptic Labs has launched on a total of 20 smartphone models.

“Elliptic Labs’ AI Virtual Smart Sensor Platform was launched on nine smartphone models in April 2025, bringing our total to 20 smartphone model launches year-to-date,” said Laila Danielsen, CEO of Elliptic Labs.

AI Virtual Proximity Sensor INNER BEAUTY

Elliptic Labs’ AI Virtual Proximity Sensor detects when a user holds their phone up to their ear during a call, allowing the smartphone to turn off its display and disable its screen’s touch functionality. This keeps the user’s ear or cheek from triggering unwanted actions during the call, such as hanging up or dialing numbers. Turning off the screen also helps conserve battery life.

Proximity detection is a core capability that is used in all smartphones, but Elliptic Labs’ AI Virtual Proximity Sensor is a unique, software-only solution that delivers robust proximity detection without the need for a dedicated hardware sensor. By replacing hardware sensors with software sensors, the AI Virtual Proximity Sensor reduces device cost and eliminates sourcing risk.

About Elliptic Labs

Elliptic Labs' AI Virtual Smart Sensor Platform™ brings contextual intelligence to devices, enhancing user experiences. Our technology uses proprietary deep neural networks to create AI-powered Virtual Smart Sensors that improve personalization, privacy, and productivity.

Currently deployed in over 500 million devices, our platform works across all devices, operating systems, platforms, and applications. By utilizing system-level telemetry data to cloud-based Large Language Models (LLMs), the AI Virtual Smart Sensor Platform delivers the unrivaled capability to utilize output data from every available data source. This approach allows devices to better understand and respond to their environment, making technology more intuitive and user-friendly. At Elliptic Labs, we're not just adapting to the future of technology – we're actively shaping it. Our goal is to continue pushing the boundaries of contextual intelligence, creating more intuitive and powerful experiences for users worldwide.

Elliptic Labs is headquartered in Norway with presence in the USA, China, South-Korea, Taiwan, and Japan. The company is listed on the Oslo Stock Exchange. Its technology and IP are developed in Norway and are solely owned by the company.
