

Maven Wireless granted two new patents

Maven Wireless, a market leader of groundbreaking solutions for wireless coverage, has been granted one new patent from IP Australia and a first patent approval in South Korea

Maven Wireless provides ground-breaking solutions in wireless coverage all over the world. The company offers a unique and comprehensive DAS system for indoor and tunnel coverage. The solutions are unique and future-proof, and supports all relevant technologies from 2G to 5G as well as bluelight services. The company has an active strategy for intellectual property rights, including patents, to protect its proprietary products.

Including the new granted patents, Maven Wireless possesses 48 patents worldwide and has additionally 24 patent applications pending. The new Australian patent covers key elements of multioperator ORAN-based systems. The first approved patent in South Korea covers how to attain signal dominance in a distributed antenna system (DAS). These two patents support and protect Maven Wireless' business in the Asia and Pacific region.
