

## **PRESS RELEASE**

August 17, 2023

# **Ziccum to present at Investor Conference BioFuture 2023 in New York**

**Ziccum AB is to present at the BioFuture 2023 conference in New York City, October 4 – 6 2023, a key industry event attracting top-tier investors to evaluate innovators in biopharmaceuticals.**

Ziccum CEO Ann Gidner will present Ziccum's unique drying technology for biopharmaceuticals, LaminarPace, and its market potential at BioFuture 2023. Uniquely, LaminarPace enables new delivery and greatly improved stability for biopharmaceuticals, potentially making new treatments available for patients world-wide. Most importantly, the enormous potential of the mRNA/LNP therapy and vaccine platform could be unlocked if delivery and stability challenges were solved. Ziccum presented excellent data in mRNA/LNP trials during spring 2023, followed by two prestigious industrial feasibility agreements being signed.

Driven by public & private initiatives, BioFuture has emerged as a hub for innovation in the life sciences and digital health space. LifeSciNY is allocating 500 MUSD in investment to build the Life Science arena.

Ziccum has been represented at a series of high-profile industry events throughout the year – including the Global mRNA Therapeutic Summit in Boston, Mass. and the invitation-only Longwood Healthcare Leaders Spring Conference. In June / July, Ziccum reported signing two major new Evaluation Agreements for Feasibility Studies for mRNA/LNP projects with major Pharmaceutical /Biotech corporations leading the mRNA-field.

Ann Gidner: "it is exciting to participate at BioFuture in New York. We are proud to be presenting the Ziccum core concept, successful data and the very significant mRNA market outlook to US investors, taking a next step in our international outreach".

## **About Ziccum**

---

Ziccum is developing LaminarPace™, a unique ambient drying method for biopharmaceuticals and vaccines based on mass transfer, not heat transfer. The technology is offered by licensing to vaccine and biologics developers and manufacturers in the global pharmaceutical industry. By reducing drying stress to the active ingredient, LaminarPace™ uniquely enables particle-engineered, thermostable dry powder biopharmaceuticals which can be easily handled and transported and are highly suitable for novel administration routes. The technology has been successfully applied to mRNA, peptides, proteins, antibodies, lipids and enzymes as well as excipients and adjuvants, and is well suited for industrial application. Ziccum is listed on the Nasdaq First North Growth Market.
