

Diadrom joins panel during Techarena 2026 – hosted at the Kista Science City booth

On February 11, Diadrom will participate as a panelist at the side event Partnering for Defence Capability during Techarena 2026 at Strawberry Arena in Stockholm. The session will take place at the Kista Science City booth as part of Techarena's official side event program.

Diadrom's CEO Viktor Eliasson will share the company's perspective on how faster innovation and stronger defence capability can be achieved through new forms of collaboration between established defence players and technology-driven startups.

Modern defence environments consist of complex systems of systems, where software, connectivity and continuous updates are critical to availability, security and operational performance. In this context, interoperability, traceability and close collaboration are key to shortening lead times, reducing risk and accelerating the deployment of new technology.

The panel also includes representatives from:

- Scaleout Systems, Daniel Zakrisson
- Thales, Victoire Andrau and Oscar Hovstadius

The session will be moderated by Linda Krondahl.

Diadrom views its participation as an opportunity to contribute to the dialogue on how Sweden and Europe can build more resilient, software-defined and collaborative defence capabilities through stronger innovation ecosystems and closer partnerships between startups and established industry players.

Meet us at the Kista Science City booth during Techarena and continue the conversation on site.
