

Acconeer receives order from Nexty worth USD 190,000

The order relates to Acconeer's A121 Pulsed Coherent Radar-sensor and is the first volume order for the previously announced design wins with a leading Japanese car manufacturer. These design wins apply to the access control use case, which enables touchless opening of the trunk lid. Delivery of the order will be done in 2025.

CEO Ted Hansson comments: "It is very pleasing that mass production of the first models from this leading Japanese automotive manufacturer is starting. We have announced six design wins with this manufacturer and expect more orders in the future. We are now in mass production with three of the world's five largest automotive manufacturers."

In addition to publicly announced orders, Acconeer continuously receives orders of smaller amounts which are not publicly announced as they are not considered to affect the share price.

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA). For more information: www.acconeer.com.
