

Region Gävleborg has decided to award Ortivus a contract on the delivery of semi-automatic defibrillators

Ortivus has been awarded a contract regarding the supply of equipment to Region Gävleborg's ambulance and hospital operations. The contract refers to the delivery of Ortivus' MobiMed Life, semi-automatic defibrillators. The order value is estimated to 4.0 MSEK and the contract duration is 2 years with a possible extension of another 1+1 years.

We are very pleased to announce that Region Gävleborg has decided to award Ortivus a contract for the supply of defibrillators to the region's pre-hospital and hospital care. The region, that has been Ortivus' customer for a long time, has been using MobiMed Monitor for patient monitoring and MobiMed ePR, electronic patient record, for several years. Through this award, the region expands with MobiMed Life and thus becomes one of the first Swedish regions to use Ortivus' entire product offering in its prehospital operations.

The contract covers 100 units of the Reanibex 300 model and 75 units of the Reanibex 100 model. Ortivus has exclusive distribution rights for Reanibex in the Nordics, UK and Ireland. Other eligible parties outside the region are Ljusdal municipality, Gästrike Rescue Service, Hudiksvall municipality and the Hälsingland Municipal Association.

"Historically, our collaboration with Region Gävleborg has been very successful and we are thankful for their continued trust in Ortivus and our solutions. With this award regarding MobiMed Life, the region will get a competitive solution." Says Stefan Ekblom, Senior Account Manager at Ortivus.

The contract will be signed after a period of 10 days from the date of the award, in accordance to the procurement regulations.

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 3.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
