

Modular Finance launches Holdings UK

For a decade, Holdings has delivered high-quality ownership data and smart analytics tools, establishing itself as the leading platform for Nordic shareholder data. Today, exactly 10 years since the launch of Holdings in Sweden, we are proud to announce the launch of Holdings UK.

Essentially, it's the same trusted platform and analytics tools as always, but now also upgraded with accurate and up-to-date data for over 1,500 U.K.-listed companies and more than 350,000 portfolios. Holdings UK will provide extensive insights into ownership changes, insider trades, short trades, liquidity, corporate governance, and more.

"For over two years, we have dedicated ourselves to understanding U.K. ownership data. I am proud of the Modular Finance team, whose hard work has made it possible to come to the market with something new. We are thrilled to launch Holdings UK and make it available to all market participants who can benefit from accurate and up-to-date ownership data," says Petter Hedborg, CEO & Founder of Modular Finance.
