

## One of the leading broadband operators in Finland selects Waystream

**One of the leading broadband operators in Finland has, following an extensive evaluation and testing period, signed a longterm agreement with Waystream and selected the company as its supplier of access switches. The first orders have been placed and will be delivered throughout the year.**

The decision to choose Waystream is based on several key factors, including high technical performance, energy efficiency, and a strong sustainability focus. Waystream's production in Sweden, combined with its longterm commitment to sustainable solutions, aligns well with the operator's ambition to reduce climate impact and build futureproof broadband networks.

"Being selected by one of the leading broadband and digital service providers in Finland is a strong endorsement of both our technology and our organization. It confirms that our solutions are well suited for largescale operators with high technical and sustainability requirements. We are proud that our products not only deliver outstanding performance, but also contribute to a more sustainable digital infrastructure," says Fredrik Lundberg, CEO of Waystream Group.
