

Diadrom joins panel on responsible AI at Capgemini's SHIFT 2026

Viktor Eliasson, CEO of Diadrom Holding AB (NGM: DIAH), takes part in a panel on trust, governance and responsible AI at SHIFT 2026, Capgemini's Data & AI Summit. The event is broadcast online on 11 November, 10:30 to 13:00 CET, and is free to attend.

Now in its eleventh edition, SHIFT is the largest Nordic online event dedicated to data, AI and analytics. This year's theme is Redesigning business for an agentic age, focusing on how Nordic organisations create measurable business value with AI.

The panel is part of the Trust, governance and responsible AI track, under the heading Creating speed with control. It is moderated by Kim Berg, Global CTO Data & AI at Sogeti. Viktor Eliasson is joined by Zaid Saeed, CEO of SCALINQ, Patrik Löwendahl of Microsoft Sweden and Emma Hasselgren of Capgemini Invent. The panel was recorded at Epicenter in Stockholm in October and airs as part of the programme on 11 November.

Diadrom brings the perspective of systems where software and data must be trusted throughout their entire lifecycle. The company has more than 25 years of experience in diagnostics and embedded software, software in over 250,000 vehicles in production, and has delivered to defence customers since 2012.

"In vehicles and defence, AI isn't a pilot. It's systems people need to trust for 15 to 30 years, and that takes both speed and control. Our motto is Nothing works until everything works, and it matters more than ever as AI becomes part of those systems. In our world, a bug isn't just a bug, it can be an accident. For us, AI isn't about convenience, it's about consequences, and that's what we look at. I'm grateful to Capgemini for inviting us into the conversation. What we concluded, you'll hear on 11 November," says Viktor Eliasson, CEO of Diadrom.

Registration

SHIFT 2026 is broadcast online on 11 November, 10:30 to 13:00 CET. Participation is free.
