

The Chairman of the Board of Freemelt Holding AB (publ) holds 448,500 shares following recent transactions

Kai Gruner, the recently appointed Chairman of the Board of Freemelt Holding AB, held 488,500 shares in the company prior to recent transactions. On May 30, he carried out a series of transactions in his personal equity portfolio, resulting in a net sale of 40,000 shares. Following these transactions, his current holding amounts to 448,500 shares.

"I acknowledge that the transactions on May 30 were unfortunate and may have raised questions. I regret the situation. My holding in Freemelt is long-term, and I intend to increase my stake in the company moving forward. This reflects my strong belief in the company's potential and future growth", says Kai Gruner, Chairman of the Board at Freemelt Holding AB.

About Us

Freemelt develops advanced 3D printers for metal components and aims to become the leading supplier in additive manufacturing (AM) using E-PBF technology, targeting SEK 1 billion in revenue by 2030. The solutions primarily support companies in the defense, energy, and medical technology sectors in Europe and the USA, enabling them to drive innovation and improve production efficiency. Founded in 2017, Freemelt has expanded its product portfolio to include three printer models, with two designed for industrial production and one (Freemelt ONE) targeting research institutes and universities. The modular industrial printers (eMELT) leverage E-PBF technology, delivering significantly higher efficiency compared to other machines on the market while maintaining flexibility in metal selection.

Freemelt generates revenue primarily through the sale of advanced 3D printers at fixed prices, complemented by support and maintenance services, which are expected to account for 25% of total revenue by 2030.

The company is now focused on further industrializing its product and service portfolio and driving commercialization in the European and North American markets. Read more at www.freemelt.com
