

Ortivus is awarded a strategically important contract on prehospital patient monitoring to Region Skåne

Ortivus has been awarded a contract for the delivery of equipment to Region Skåne's ambulance operations. The contract applies to the delivery of Ortivus' solution MobiMed Monitor, including hardware and software, to the region's emergency vehicles. The delivery also includes external defibrillators. The delivery value is estimated to 30 MSEK. The contract duration is 2 years with a potential extension of 2 years.

Ortivus currently delivers MobiMed to 15 out of Sweden's 21 regions. The fact that Ortivus is awarded a contract with Region Skåne, which owns one of the country's largest ambulance services, means that the company is expanding its customer base with another Swedish region. In addition to MobiMed Monitor hardware and software, the delivery also includes telemedicine solutions and integrations as well as external defibrillators from Bexen-Cardio, for which Ortivus has exclusive distribution rights in the Nordic countries, UK, and Ireland.

"Our solutions, that focus on ergonomics, safety and flexibility, once again prove to be completely in line with the requirements of modern ambulance care. This award is strategically important for Ortivus as we now can deliver MobiMed to one of Sweden's largest ambulance organisations." says Elias Obaid, European Sales Manager at Ortivus.

The contract will be signed after a period of 10 days from the date of the award, in accordance with the procurement regulations.

About Ortivus

Ortivus develops and commercialises MobiMed, medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' products are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm and the company has, since 1998, a wholly-owned subsidiary based in the United Kingdom.

MobiMed is a modular platform that currently is used by over 12 000 paramedics in over 2 700 emergency vehicles. The platform consists of a monitor that in real-time measures, monitors and shares patients' vital parameters, such as, ECG, blood pressure and blood oxygenation. The system also consists of an electronic patient record for decision support, collection of patient data and clinical documentation.

MobiMed has a total weight of 2.5kg and is created to function in a demanding environment and out in the field. The two-way communication supports telemedicine consulting with clinical experts while patient data is seamlessly integrated into the medical records at the hospitals and primary care centers. MobiMed saves time and helps healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
