

Creturner Group AB in partnership with fintech platform Eucaps

As part of the internationalisation strategy, Creturner Group AB has entered into a collaboration with the fintech platform eucaps.com. The purpose is to facilitate information dissemination and dialogue with existing shareholders and to reach out to new investor groups outside Sweden.

"Eucap's platform offers a large number of opportunities for us to drive international interest in our share, at the same time as we can easily create dialogue and keep our existing shareholders updated on our development", says Joakim Erlandson CEO and continues: "It feels fantastic that we have now succeeded in finding a solution to our communication needs, even outside Sweden's borders. Now that we have begun the internationalisation of our business and are already tradable on Börse Stuttgart, it is only natural that our share can also receive international attention and attract new investors".

Eucaps' platform offers global transparency for companies in the European small-cap segment, which means, among other things, that Creturner becomes available to investors from all over Europe. Eucaps ensures that investors have full access to accurate information, reports, stock prices, shareholder data, news, etc. As a corporate customer of Eucaps, companies can share what makes them unique, market their company and maintain a direct dialogue with verified investors.

"We are pleased that Creturner Group AB has chosen to grow with us. Our goal is to make the opportunities in the European small-cap market visible to international investors, prevent market manipulation and create better liquidity and price formation in these companies", says Henrik Wagenius, CEO and founder of Eucaps, "small-caps have so far been kept out of the international financial market, it is time to change this".

- "We are really looking forward to the cooperation and hope to help Creturner Group AB create secure and satisfied shareholders and that existing as well as new owners can follow Creturner and get relevant and current information about their development", says Carl-Marcus Aman, Key Account at Eucaps.

Eucaps is also available in Google Play & App Store.

Creturner Group AB is a group with two business areas in environmental technology. The digital part is a technical computing business that is expanding to strengthen its long-term potential and create a presence in the rapidly growing market for computing capacity. The company has its own facilities in Sweden with its own energy production to reduce raw material costs and environmental impact.

The environmental technology division offers corporate customers an efficient and permanent method for carbon offsetting their operations. The method is based on Bio-CSS (Carbon Capture and Storage), which involves converting residual biomass into the element carbon and depositing it to reduce the amount of CO₂ in the atmosphere. Creturner's corporate customers can then purchase carbon offsets in the same way as traditional carbon offsets such as tree planting. Unlike tree planting, Creturner's method is immediate, permanent and clearly measurable. The follow-up is done through linked smart contracts that give the customer insight into the outcome and future financial returns from the environmental investment. www.creturner.com

The company is listed on NGM Nordic SME in Stockholm, Sweden and on the Stuttgart Stock Exchange in Germany.

Eucaps.com is an information, communication and transaction platform provided by Eucaps Holding AB. Eucaps.com offers an arena where European listed SMEs and investors can easily find each other and where companies are given the opportunity to communicate directly with new and existing investors in a smarter, simpler and safer way. EUCAP was launched in March 2023 and already has about 30,000 Swedish investors who use the platform to make better and more informed decisions about their next investment.
