PRESS RELEASE

16 January 2025 13:45:00 CET

WORLD PREMIERE FOR AQUADOR 400 HT WHEN NIMBUS PARTICIPATES AT THIS YEAR'S BOOT DÜSSELDORF

When the German boat show Boot Düsseldorf opens this weekend, Nimbus Group's new Aquador 400 HT will make its world premiere. Nimbus 495 Flybridge, the largest boat from Nimbus to date, will for the first time be on display at Boot Düsseldorf.

Aquador celebrates its 30th anniversary this year, and this is recognized, among other things, by the 400 HT getting its world premiere. The model is the largest that Aquador has built in its 30-year history and is the last boat in the series of three new boat models from Aquador that began to be launched in 2022. First off was the 300 HT, which last year was awarded a silver medal by the jury for Motor Boat of the Year in the category "Sportscruisers" up to 45 feet. In 2023, the Aquador 250 HT was launched and this year it is time for the 400 HT. 400 HT has a total length of approximately 12 meters, a width of nearly 4 meters, 3 cabins and a total of 8 berths as well as large social areas. Aquador 400 HT can be equipped with both inboard and outboard engines based on customer requirements and wishes.

In addition to the Nimbus 495 Flybridge and Aquador 400 HT, Nimbus Group will also exhibit updated versions of the boats from the Nimbus WTC 11 series. At the show, Nimbus Group will also display Nimbus Connect, a mobile connected device that can provide boat owners with central data about the boat in real time via an app, such as engine status, fuel volumes, battery voltage and service needs but also warn if everything on board is not as it should be. The system also connects the boat to service yards and the app contains all relevant information about the boat in question. Nimbus Connect is standard equipment on all Nimbus boats from model year 2025.
