## About Surgical Science Sweden AB (publ)

---

One of the biggest challenges within healthcare globally is how injuries during care can be reduced. Medical education and training are key, as a large part of the training today can be performed outside the operating room. The simulators enable surgeons and other medical specialists to train and improve their psychomotor skills and instrument handling before entering the operating room. In parallel with its own products, Surgical Science works with simulation solutions for medical technology companies that develop surgical instruments for clinical use, such as robotic surgery.

Surgical Science is headquartered in Gothenburg, Sweden and present in Stockholm, Sweden, Tel Aviv, Israel as well as in Seattle, Washington, in the US. Through sales offices in the US, France, China and UAE as well as a global network of distributors, Surgical Science maintains a presence in most markets around the world.
