

BEAMMWAVE EXPANDS ITS DIGITAL BEAMFORMING PATENT PORTFOLIO

BeammWave has received a notice of allowance from the European Patent Office. The patent covers a method to pre-process data for an efficient digital beamforming.

BeammWave have has a total of 38 patent families in different stages protecting its unique digital beamforming concept.

"Digital beamforming is undisputingly delivering a much higher performance than its analog competitor. What however been disputed is how to get it power and cost efficient. This patent of a data pre-processing method is part of the BeammWave secret sauce to solve exactly that", says Bengt Lindoff Chief Systems Architect of BeammWave.

About Us

BeammWave AB are experts in communication solutions for frequencies over 24GHz. The company is building a solution intended for 5G and 6G, in the form of a radio chip with antenna and associated algorithms. The company's approach with digital beamforming is unique and patented, with the aim of delivering a solution with higher performance at a lower cost. The company's share serie B (BEAMMW B) is listed on the Nasdaq First North Growth Market in Stockholm. Certified Adviser is Redeye AB.
