

Lumito terminates mentorship agreement

Lumito AB (publ) ("Lumito" or the "Company") has terminated its mentorship agreement with Mangold Fondkommission AB. Under the rules of NGM Nordic SME, the obligation to appoint a mentor applies during the first two years following a listing. Lumito has been listed since autumn 2018 and considers that the mentorship is no longer necessary. The termination of the mentorship agreement is not expected to have any material impact on the Company's operations or its ability to comply with the marketplace's rules and regulations. The mentorship agreement will terminate on 26 November 2026.

About Lumito

Lumito specialises in medical technology and translational research in digital tissue imaging. Lumito offers a groundbreaking, highly sensitive imaging technique to locate and measure protein biomarkers in tissue samples using up-converting nanoparticles (UCNPs) through its patented research platform. The technology combines image data with precise biomarker detection, enabling images with higher contrast where irrelevant background information is filtered out. The technique can enhance the analysis of tissue samples by increasing objectivity, thereby contributing to research for more quantifiable diagnoses and optimised treatments. Lumito primarily focuses on drug development and digital pathology and is a spin-off from a research group at Lund University's Department of Atomic Physics and Laser Center. www.lumito.se/en/

The share is traded on NGM Growth Market under the name LUMITO, and Mentor is Mangold Fondkommission.
