

M.O.B.A. Network launches Valofessor in-game app for Valorant gamers

Stockholm, Sweden - October 23, 2024 – M.O.B.A. Network AB, a leading provider of data-driven solutions and community platforms for gamers, today announces the launch of Valofessor, its second in-game app, designed for players of Riot Games' popular first-person shooter, Valorant. The app is now live on the Overwolf platform, enabling players to access essential in-game tools and insights.

Valofessor builds on the success of M.O.B.A. Network's first in-game app, Porofessor, which serves millions of users globally with tools for League of Legends. Valofessor continues this tradition by delivering comprehensive data, performance analytics, and game strategies tailored to Valorant, directly from its website backend, [Valofessor.gg](https://valofessor.gg).

Valofessor is now available on the Overwolf platform, offering data-driven insights and tools for the global Valorant community.

Key Features of Valofessor

- Bomb timer in-game overlay: keep track of bomb timings with a seamless overlay.
- User-friendly interface: Valofessor features a familiar layout similar to Porofessor, providing easy navigation and a consistent experience.
- Detailed player profiles: view your own profile or others, complete with performance statistics and match history.
- Agent tier list & details: access rankings and detailed information about each agent, including moves and stats.
- Maps insights: explore map stats, with in-depth line-ups and strategies for key locations.
- Weapons analysis: review weapon tier lists, detailed stats, and shot types.
- Rankings & match details: analyze match data and track rankings across the competitive ladder.

With many new features in development, M.O.B.A. Network remains committed to actively listening to user feedback to deliver valuable updates that enhance the gaming experience for casual, competitive, and professional players alike.

Strategic partnership with Overwolf

The launch on the Overwolf platform allows Valofessor to benefit from a leading ecosystem for in-game apps. Overwolf, backed by renowned investors such as Andreessen Horowitz, Intel Capital, and Ubisoft, provides a robust infrastructure that ensures a seamless user experience and broad distribution potential. This partnership positions Valofessor to rapidly grow its user base and monetize through ads, similar to Porofessor's success.

Valorant: a global gaming phenomenon

Valorant has firmly established itself as a top title in the competitive esports landscape.

Known for its strategic team gameplay, precise shooting mechanics, and unique character abilities, the game currently engages approximately 20-28 million monthly active players worldwide. With its growing player base and thriving esports scene, Valorant continues to attract gamers from all levels, making Valofessor an essential tool for players looking to improve their skills and strategies.

Building on the success of Porofessor

M.O.B.A. Network's track record with Porofessor, which has reached over 13,5 million installs and sees 500-700k daily active users, demonstrates the company's expertise in creating high-quality, user-centric apps. With Valofessor, the company aims to replicate and expand this success by tapping into the large and dedicated Valorant community.

"We are excited to bring Valofessor to the Valorant community through our partnership with Overwolf. The app offers players a wealth of data and tools to enhance their gaming experience, building on the strong foundation established by Porofessor," said Anders Ribbing, CEO of M.O.B.A. Network. "We are confident that Valofessor will quickly become the go-to app for all types of Valorant players, from casual gamers to esports professionals."
