

Additional information on the follow-up order from Consilium Safety Group worth SEK 720,000

Insplorion's strategic partner, Consilium Safety Group, has now officially placed a follow-up order worth SEK 720,000 of NPS-P2 detectors. The purchase order marks an important commercial step within the exclusive distribution agreement signed in February 2025.

Earlier in Q2, Insplorion communicated an update on its strategic development and ongoing key initiatives, where a follow-up order from Consilium Safety Group was expected. This press release provides more information about the order and confirms that it has been placed.

This deal represents the first follow-up order under the agreement, which grants Consilium exclusive rights to sell Insplorion's hydrogen detectors within the marine market. The order represents a clear signal of the growing interest in the marine sector for safety solutions using an inerted environment – for which the Insplorion NPS-P2 Hydrogen detector has been designed. All detectors are reserved for one end-customer who supplies a crucial hydrogen system for a large cruise ship.

The Insplorion NPS-P2 is currently in the process of both ATEX (Insplorion) and relevant maritime certifications (Consilium) that are needed for delivery to the end customer. In the meantime, an initial small sensor batch will be delivered to verify the performance in the customer's setting.

About Insplorion

Insplorion's vision is to use sensor technology for an accelerated transition to a sustainable future. With its unique sensor platform NanoPlasmonic Sensing (NPS), Insplorion operates within two fields; hydrogen sensors and research instruments. The hydrogen sensors enable safe and efficient deployment of hydrogen infrastructure through its unique benefits in detection speed, selectivity and ability to function in environments where many sensor technologies cannot. Our instruments give scientists around the world real time data within battery research and surface processes in fields like catalysis, material- and life science. Redeye AB is Insplorion's Certified Adviser on Nasdaq First North Growth Market.
