Takorama Elteknik in new deal for Catena – solar, energy storage, roofing and electrical engineering services

Takorama Elteknik has received a new order for the logistics property company Catena. The deal includes roofing, solar installation, two energy storage facilities and electrical engineering services at two logistics properties in Borås. The projects will start in the beginning of 2025. The total order value for the assignments amounts to approximately SEK 11 million.

Takorama has been part of Soltech since 2020 and has since broadened its offering to offer solar energy solutions in addition to roof contracting. In 2023, the company made an add-on acquisition of the electrical engineering company Din Elkontakt, changed its name to Takorama Elteknik, and developed the business into a full-service company with a complete comprehensive offering in roofing, solar energy, energy storage and electrical engineering. An investment that has broadened the offer and created new business opportunities.

The company has now received renewed confidence from Catena. The new assignments will be carried out at Catena's properties in Borås. In addition to solar energy, energy storage and accompanying electrical engineering work, the roof replacement will largely be carried out with a circular waterproofing layer with a frame of recycled material. Work is scheduled to begin in Q1 2025 and the installations are expected to be completed and commissioned in Q2 2025.

– It feels great that we are deepening our collaboration with Catena further. This deal also shows that our focus on overall solutions is paying off. The fact that we take care of everything from solar, roofs, energy storage, electrical engineering services and subsequent service and maintenance creates a long-term security for the customer that we are very happy to be able to offer, **says Pierre Sahlin, Head of Solar Energy at Takorama Elteknik.**

Press Release**04 December 2024 13:00:00 CET**

– We look forward to working with Takorama Elteknik on these properties, the efforts are in line with Catena's efforts to continuously refine our property portfolio to ensure quality and long-term sustainable solutions that meet both today's and tomorrow's needs, **says Jonas Arvidsson, Regional Manager at Catena.**
