

Hilbert Group Completes Major Milestone 3 months Ahead of Schedule for the Syntetika Launch

Hilbert Group AB (Nasdaq: HILB B) today announced the early delivery of the SyntX decentralized exchange (DEX) for Real World Asset (RWA) trading, developed by **Private Pools Network** (PPN). The completion of SyntX marks the first of two foundational modules in the forthcoming **Syntetika** platform, scheduled to launch in September 2025.

The SyntX DEX is fully operational and has undergone several months of test trading. It will support the trading of tokenized pre-IPO equities and other RWAs. The second module, SyntH, will host tokenized funds managed by Hilbert and third-party asset managers.

Syntetika is both a trading venue and tokenization platform, integrating traditional assets and major cryptocurrencies. It leverages **Galactica**'s zero-knowledge KYC (zkKYC) technology to ensure regulatory compliance without compromising user privacy.

As part of the strategic partnership with **PPN** and the payment for SyntX, Hilbert has acquired a minority equity stake in Private Pools Network. PPN will continue to provide technical development, maintenance, and automated market-making services for the platform.

Barnali Biswal, CEO of Hilbert Group, commented: "We are very pleased with PPN's delivery of SyntX well ahead of schedule. Beyond its cutting-edge technology, PPN brings a strong network of venture capital firms and early adopters that are already contributing to securing AUM for the platform's launch."

Bernardo Marques, CEO of Private Pools Network, added: "The timing is perfect. We look forward to supporting Hilbert with the infrastructure, execution, and innovation needed to make Syntetika a leader in tokenized finance."

About Private Pools Network

Private Pools Network is a blockchain protocol that provides a comprehensive suite of yield-generating products. By harnessing an in-house market making engine alongside an advanced automatic market-making (AMM) system, it effectively captures market volatility and optimizes returns for DeFi liquidity providers.

About Galactica

Galactica is a pioneering blockchain platform that has developed world leading technology in terms of digital identity, regulatory compliance, and privacy in decentralized finance/Web 3.
