

Mycronic receives order for a mask writer and a metrology system

Mycronic AB (publ) has received an order for a Precision Lite 8 Evo and a Precision MMS from an existing customer in Asia. The order value is in the range of USD 12-14 million. Delivery of the Precision Lite 8 Evo is planned during the second quarter of 2027, whereas delivery of the Precision MMS is planned during the third quarter of 2027.

The Precision Lite 8 Evo mask writer is designed to meet the requirements for cost-efficient production of mainstream photomasks for displays up to G8 mask size. Precision MMS is a metrology system for quality assurance of photomasks for displays, by measuring the position of the written pattern on the photomask.

We're delighted to receive this combined order. The Precision Lite 8 Evo supports cost-efficient production of mature photomasks, while the replacement order for a Precision MMS confirms its position as the industry standard for display photomask metrology," says Charlott Samuelsson, Sr VP Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers and metrology, inspection and repair systems for display manufacturing and production of semiconductors.
